<p>             1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved.           </p>	<p>             2. The second step is to analyze the problem. This involves breaking the problem down into smaller parts and identifying the causes.           </p>	<p>             3. The third step is to develop a plan. This involves deciding on the best way to solve the problem and setting goals.           </p>
